District, Shanghai, China

- **experience**

I have experienced as an international student for several years and I understand their worries and expectations. Therefore, I would be happy if I could have this chance to serve them. In my previous school, I had always worked as a student, and during the process, I had encountered many difficult situations. Therefore, I want to use those experiences to help people that are similar to me or are experiencing the same cases, so that they won't be upset or worried and able to spend more effort on their studies.
